Making Safety Happen

About Us

Safetyware EHS Consultancy Sdn. Bhd. was formed in July 2011 to bring together a number of experts and specialists in the fields of health, safety and environmental management. Safetyware EHS Consultancy, a member of the Safetyware Group, is one of the major training & service provider in the field of occupational safety and health.

We work closely with our clients in order to meet their requirements and expectations by providing assistance and advice in the comprehensive field of Environment, Health and Safety.

We are ISO 9001:2015 certified and are PSMB approved training provider. With our certifications customers can be assured that we have international audited standards for our process and procedures and our commitment towards environmental concerns.

Our team of experienced and certified trainers will deliver the training programme at your location. Customized content and relevant topics are provided to address consent and safety needs of our respected clients. We at Safetyware EHS Consultancy believes by combining the mix of skills, expertise and experience under one roof enables us to provide wide range of services in a cost effective and integrated manner.

At Safetyware, providing quality products and exceptional services to our customers is our top priority. We believe that by helping you choose the products you need, we've only completed half of our job. To ensure customer satisfaction, we offer a series of value added services such as technical assistance, customer care program, product briefing and usage training and many more.

Why Choose SAFETYWARE EHS CONSULTANCY ?

- [1] **Tailored for You:** Our courses can be tailored to your specific needs
- [2] **Cost Effective:** Lower costs per head to train your employees and your training fees are claimable under HRDF
- [3] **Save Time:** We can alter the length of some courses to suit your delegates
- [4] **Flexibility:** We can deliver training when, where and how you want it

Personal Growth & High Performance

Poka-Yoke (Mistake Proofing) in Problem Prevention

Productivity Improvement through 5S Implementation

Root Cause Analysis & Effective Corrective Action

Total Quality Management (TQM)

Our Services

Industrial Hygiene

Chemical Health Risk Assessment (CHRA)

The CHRA is an assessment that has to be conducted by the employer arising from the use, handling, storage or transportation of chemicals hazardous to health in their workplace as required by the Occupational Safety and Health (Use and Standard of Exposure of Chemicals Hazardous to Health) Regulation 2000

Occupational Hygiene Monitoring

Occupational Hygiene Monitoring also known as exposure monitoring is a process of evaluating and documenting employee potential exposures to biological, chemical and physical hazards. Monitoring can be qualitative, semi-quantitative or quantitative

Local Exhaust Ventilation (LEV) Inspection

Local Exhaust Ventilation (LEV) Inspection is an engineering system designed to reduce employee exposure to airborne contaminants (dust, mist, fume, vapour, gas) in the workplace by capturing the emission at source and transporting it to a safe emission point or to a filter/ scrubber

Noise Exposure Monitoring

A dosimeter is like a sound level meter except that it stores sound level measurements and integrates these measurements over time, providing an average noise exposure reading for a given period of time, such as an 8-hour workday

Indoor Air Quality (IAQ) Monitoring

A healthy indoor air environment is one that maintains the comfort, health and wellbeing of the occupants. Air quality is a high priority; employers, building owners and operators are required by law to provide a safe workplace environment for employees, tenants, and visitor

Our Services

OSH Consultation

OHS Consultation helps to promote a positive health and safety culture in the workplace.

We help organization for ensuring that employers and workers comply with safety legislation and that safety policies and practices are adopted and adhered to.

We help to plan, implement, monitor and review protective and preventative safety measures.

We work in partnership with employers, employees, directors and trade unions to minimise:

- **Operational losses;**
- **Occupational health problems;**
- **Accidents;**
- **Injuries.**

Therefore with the above it helps organization to be more productive and develop a better and conducive workplace

Typical Work Activities

OSHO consultancy vary depending on the employer and may cover, for example, fire safety or safe use of machinery or noise, etc. However, duties typically involve:

- Carrying out risk assessments and considering how risks could be reduced;
- Outlining safe operational procedures which identify and take account of all relevant hazards;
- Carrying out regular site inspections to check policies and procedures are being properly implemented;
- Making changes to working practices that are safe and comply with legislation;
- Preparing health and safety strategies and developing internal policy;
- Leading in-house training about health and safety issues and risks;
- Keeping records of inspection findings and producing reports that suggest improvements;
- Recording of incidents and accidents and producing statistics;
- Being up to date with new legislation and maintaining a working knowledge of all legislation and any developments that affect the employer's industry;
- Ensuring the safe installation of equipment;
- Advising on a range of specialist areas, e.g. fire regulations, hazardous substances, noise, safeguarding machinery and occupational diseases.

Safety Consultation (1-12 months)

Even Better Support During a Rescue

Introducing a new defibrillation platform from ZOLL that builds on our reputation for providing rescuers with unmatched support plus a low total cost of ownership: The ZOLL AED 3™.

Like the AED Plus that preceded it, and all of ZOLL's professional defibrillators, the AED 3 is equipped with Real CPR Help technology to help lay rescuers perform high-quality CPR. The sensor in the pads lets the AED see your chest compressions so it can guide you to the proper rate and depth with prompts and an on-screen bar gauge.

"WiFi-enabled Programme Management Onboard"
You can reconfigure it, upgrade software to the latest Guidelines, and download event data files easily using the interactive touchscreen and onboard USB port.

Zoll AED 3™ BLS.C

AED Plus

Automated External Defibrillator (AED)

The latest American Heart Association (AHA) Guidelines, issued in 2010, are clear: successful defibrillation requires high-quality CPR performed at the proper depth and rate. When it's time for CPR, the AED Plus® with Real CPR Help® provides the best support to help save a life.
